Changes in file paths

The directory structure has been rearranged since the last version. To make your configuration work, you need to move some files to new places using the following shell commands.

```
mv /opt/balasyss/etc/{license.txt,config.yml} /opt/balasyss/etc/pas/  
mv /opt/balasyss/etc/docker-compose.* -> /opt/balasyss/etc/infrastructure/pas/
```

In general, all configuration files that are to be mounted inside the container need to be placed in `/opt/balasyss/etc/pas/` and configuration files that are relevant to the hosting infrastructure need to be placed in `/opt/balasyss/etc/infrastructure/pas/`.

Change in Restart policy implementation

Restart policy implementation has been moved from docker compose to Systemd. This means that the `PAS_RESTART_POLICY` variable in `/opt/balasyss/etc/infrastructure/pas/docker-compose.conf` is not effective any more. Systemd is capable of implementing more fine-grained restart policies. For details, please refer to the *PAS restart policy* section of the Administration Guide.
