## Features

- **Cluster functionality implementation**  
Now management and core components can be installed on separate machines.
- **High Availability**  
You can deploy the PAS product in a high availability setup. Active/passive HA is available. A core node can be deployed and configured remotely from the management node.

## Fixes

- **Display issue in TLS Bricks GUI**  
We have fixed the cipher default value appearing on the Web User Interface. Now it doesn't break the page.
- **OpenAPI endpoints return HTTP 502 error**  
We have restructured the component schema and OpenAPI schema. We have made the OpenAPI endpoint available without authentication.
